# About this Course

FPGA Course for Scientists is a comprehensive hands-on program designed for scientists and engineers with little to no FPGA programming experience. Through practical examples and incremental learning, participants will develop the skills to create custom FPGA designs interfacing with digital & analog IOs.

# About the Instructor

**Dr. Pau Gómez** is a physicist and FPGA developer specializing in Quantum Physics and high-speed Digital Electronics. With extensive experience in quantum applications and FPGA development, he brings practical expertise in:

- Quantum Key Distribution
- Zynq SoC platforms
- High-speed Digital Electronics
- FPGA development and education

# **Course Details**

# Schedule

Duration: January 27th - February 27th, 2025

Format: 6 sessions, 3 hours each (15:00 - 18:00 CET)

#### **Session Breakdown:**

- 1. January 27: Introduction & Red Pitaya basics
- 2. January 30: Vivado setup & deployment
- 3. February 6: Behavioral simulation
- 4. February 13: High-speed ADC/DAC
- 5. February 20: Direct Digital Synthesis
- 6. February 27: DMA & waveform generation

\*Schedule subject to change with advance notice

## Topics Covered

- Red Pitaya as an open-source software-defined instrument
- Xilinx Zynq FPGA architecture
- Vivado development environment
- PYNQ (Python runtime configuration)
- VHDL/Verilog development
- Digital & Analog IOs
- Advanced signal processing

## **Required Hardware**

- PC/Laptop (Windows, Mac OS, Linux)
- STEMlab 125-14 Starter Kit
- Micro-USB cable
- SMA cables (2x)
- Oscilloscope
- BNC-to-SMA converters (2x)

# **Course Format**

• 100% remote delivery

RED PITAYA d.o.o., Velika pot 22, 5250 Solkan, Slovenia Registration No.: 6428797000, VAT: SI26833921 Email: info@redpitaya.com, Webpage: www.redpitaya.com

- Pre-configured remote Linux servers provided
- Recorded sessions available
- Weekly assignments
- Limited to 20 participants

# **Frequently Asked Questions**

Prerequisites & Requirements

#### **Q: Do I need prior FPGA experience?**

A: No, the course is designed for beginners. Basic programming knowledge is helpful but not required.

#### Q: What hardware is mandatory?

A: You'll need a STEMIab 125-14 kit and associated cables/converters. Course participants receive a 15% discount on the Red Pitaya board.

## **Course Structure**

#### Q: What's the time commitment?

A: Expect 5-7 hours weekly: 3 hours for live sessions plus assignment time.

#### Q: What if I miss a session?

A: All sessions are recorded and available for review. However, live attendance is recommended for interactive learning.

## **Technical Aspects**

#### Q: Do I need to install special software?

A: No, we provide pre-configured remote Linux servers with all the necessary

software.

#### Q: What programming languages are used?

A: VHDL/Verilog for FPGA programming and Python for control/configuration.

# Learning Outcomes

### Q: What will I be able to do after the course?

A: You'll be able to:

- Create basic FPGA designs
- Interface with digital/analog I/Os
- Implement signal processing applications
- Use industry-standard tools
- Deploy FPGA applications

# Administrative

#### Q: What's the cost?

A: 550€ (VAT excluded)

- Early-bird price: 500€ (until December 14th)
- Hardware discount: 15% off STEMIab 125-14

#### Q: Will I receive a certificate?

A: Yes, upon successful course completion.

## Support

#### Q: What support is available?

A: You'll have access to:

- Live Q&A during sessions
- Assignment feedback
- Technical support
- Course materials
- Recorded sessions

# Registration

#### **REGISTRATION FORM**

**RED PITAYA d.o.o**., Velika pot 22, 5250 Solkan, Slovenia Registration No.: 6428797000, VAT: Sl26833921 Email: info@redpitaya.com, Webpage: www.redpitaya.com
